DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-7, 9-11 and 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Itoh et al. US 5,086,015.

Itoh et al. discloses a method and apparatus for cutting a wire formed on a semiconductor substrate including forming a cut portion by scanning the substrate with a focused ion beam to cut the wire (8), and forming a clear region (8a), continuously from the cut portion by scanning the substrate with the FIB, wherein the cut portion is a first cavity and the clear region is a second and third cavity, wherein the apparatus has a processor, controller and memory (see figs. 4 and 7 and related text).

Claims 3, 8 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
